

## **Second Grade Science**

In second grade, students are encouraged to be enthusiastic participants in the investigation and activities of the world of science. The program blends process and content. Curriculum areas include the study of living things, the human body, properties of solids, liquids and gases, the solar system, as well as simple machinery. Important scientific skills are taught, such as observation, measurement, and prediction.

### Life Science

#### \* Human Body

Systems – Skeletal, Muscular, Circulatory, Respiratory, Digestive

#### \* Life Cycle

### Earth Science

#### \*Sun

#### \*Moon

#### \*Planets

#### \*Constellations

#### \*Meteoroid

#### \*Gravity

#### \*Environment

### Physical Science

#### \*Simple machines
